

Serial No. 10/740,202

Atty Dkt No. 706529US2

IN THE SPECIFICATION

Please replace the original paragraph 12 with the following:

[0012] FIG. 5 is a sectional view of the toe link assembly of FIG. 2 incorporated into a subframe taken along line B-B of FIG. 2[[]]; and

Please insert after original paragraph 12, the following:

[0013] FIG. 6 is an exploded view of the toe link assembly of FIG. 2 according to an alternate exemplary embodiment.

Please replace the original paragraph 20 with the following:

[0020] The bolt 16 includes a head 78, a cylindrical portion 80 extending from the head 78, and a threaded portion 82 extending from the cylindrical portion 80. In one embodiment, the threaded portion 82 includes an arcuate region 84 and a flat 86, as best shown in FIG. 3. The flat 86 is operable to engage aperture 74 of the second cam washer 26 such that the second cam washer 26 rotates with the bolt 16. While a flat 86 is disclosed, it should be understood that any suitable arrangement for locking the second cam washer 26 to the bolt 16, such as the arrangement shown in FIG. 6 showing a key 169 and slot 186 design, is anticipated and should be considered within the scope of the present invention.

Serial No. 10/740,202

Atty Dkt No. 706529US2

Please replace the original paragraph 21 with the following:

[0021] The link 14 is an elongate beam having a main body 84, a first end 86, a second end 88, and a bushing 90. The bushing 90 includes a cylindrical body 92 and is fixedly attached to the first end 86 of the link 14. The bushing 90 is matingly received by the bolt 16 such that the link 14 is operably connected to the cam assembly 12, as will be discussed further below. The second end 88 of the link 14 similarly includes a bushing 90 for attachment to a suspension system 100, as best shown in FIG. 1. According to the present exemplary embodiment, the link assembly 10 is a toe link assembly, and the link 14 is a toe link.
